BLS for Healthcare Providers

The **Basic Life Support for Healthcare Providers (BLS)** Course is designed to provide a wide variety of healthcare professionals the ability to recognize several life-threatening emergencies, provide CPR, use an AED, and relieve choking in a safe, timely and effective manner.

This course is for healthcare professionals who need to know how to perform CPR, as well as other lifesaving skills, in a wide variety of in-hospital and out-of-hospital settings.

Features

- Video based course ensures consistency
- Instructor led, hands on class format reinforces skills proficiency
- Student manual comes with new Pocket Reference Card, designed to provide quick emergency information to the rescuer at any time.
- Updated Science based content

Course Content

- Key changes in basic life support
- Critical concepts of high-quality CPR
- The American Heart Association Chain of Survival
- 1-Rescuer CPR and AED for adult, child and infant
- 2-Rescuer CPR and AED for adult, child and infant
- Differences between adult, child and infant rescue techniques
- Bag-mask techniques for adult, child and infant
- Rescue breathing for adult, child and infant
- Relief of choking for adult, child and infant
- CPR with an advanced airway*

* This is an introduction to the compression/ventilation rate and ratio for a patient who has an advanced airway in place. For more information on advanced airways, please refer to the Airway Management Course.
